

## Transmission Cable Accessories

**G&W Electric's portfolio of transmission cable accessories reflects our long history of industry leading research and development. We are a pioneer in the design and manufacturing of quality cable accessories, with a long history of expertise that actively contributes to development standards for IEEE and IEC.**

G&W Electric offers a variety of transmission cable accessories for extruded, self-contained and pipe type cables. Our power cable accessories are designed to the latest industry standards to ensure time proven, reliable system performance.

### Cable Terminations

- Ratings through 345kV
- Simple stress cone installation using mechanical shrink for extruded solid dielectric cable systems and perforated paper rolls for paper cable systems
- Porcelain and polymer designs
- Indoor, outdoor, GIS and oil immersed applications
- Designed to IEEE and IEC standards

### Cable Joints

- Normal Joints to 345kV
- Transition Joints to 145kV
- Stop Joints to 161kV
- Mechanical shrink designs available
- Designed to IEEE and IEC standards
- Joint expansion tool available to allow for mechanical shrink installation of spare joints

### Services

G&W Electric is an ISO 9001:2000 and ISO 14001:2004 certified quality supplier offering a full range of services. We offer engineering assistance in creating product specifications, installation supervision, and training classes for the Python Cable Accessories line. Go to [www.gwelectric.com](http://www.gwelectric.com) to find the G&W Electric representative near you.
